perfing. 1658.

A New Almanack AND PROGNOSTICATION for the year of our Lord God 1658.

Being the second after Biſſextile or Leap-year; And from the Worlds Creation 5622.

Compoſed, and chiefly referred to the famous City of *London*.

Made and ſet forth by *F. Perkins* Writer to the Mathematicks.

LONDON
Printed by *R. I.* for the Company of STATIONERS 1658.

The common Notes and moveable Feast according to the Englisch Account, for this year, 1658.

The Golden Number	6
The Dominical Letter	C
Shrove Sunday	21 Febru.
Easter day	11 April
Rogation Sunday	16 May
Ascention day	20 May
Whitsunday	30 May.

Note, that the Roman account is alwayes ten daies before the Englisch Account, so that their eleventh day is our first day, and our last day is their tenth day.

The Exchequer openeth eight daies before any Term begins, except the Term of Trinity, before which it openeth but four daies.

Observe that the first and last daies of every Term are the first and last daies of Appearance.

A Perfect Table of the four Terms and their Returns, with the Essoyn days, days of Exception, Returna brevium, and days of Appearance this year, 1658.

Hillary Term begins January 23. ends February 12.

Return dayes, or dayes of Essoyn,	Dayes of exception	Returna Brevium	Dayes of Appearance

Perkins. 1658.

A Prognostication for the year of our Lord God 1658.

Being the second after Bissextile or *Leap-year*, and from the Worlds Creation, 5622.

Wherein is contained the description of the four quarters of the year: As also a Chronological Table of many things worth remembrance, since the Creation, until this present year, 1658. Collected for the most part out of Ecclesiastical History, and other good Authors, something augmented.

By F. PERKINS, Well-willer to the Mathematicks.

Printed at *London* by *Robert White*, for the Company of Stationers, 1658.

ANNA BLOMBERG

A Description of the four Quarters of the year, and first of Winter.

☉ in ♑ ♒ ♓.

ACcording to the custom of writers in this kind, Winter Quarter is the first Quarter, which took beginning the 11. day of December, 1657. at which time the Sun entred into the first degree of the cold and dry sign Capricorn, being the most remote from us in his farthest South declination, causing the dayes with us to be shortest, and the nights longest: Which Quarter continuing until the Sun hath slowly passed through Capricorn, Aquarius, and Pisces. This Quarter doth naturally resemble Old age.

Of the Spring.

☉ in ♈ ♉ ♊.

THis Quarter doth take beginning the 10 of March, at which time the Sun entreth into the first minute of Aries, and doth continue whilest the Sun is a passing through these 3 vernal signs, Aries, Taurus, and Gemini. This Quarter doth resemble growing youth.

Of Summer.

☉ in ♋ ♌ ♍.

THe Summer Quarter doth take his beginning when the Sun doth enter into the first degree of Cancer, which will be this year the 11 of June, and doth continue whilest the Sun passeth through Cancer, Leo, Virgo: now are the dayes longest, and the ayr hottest; therefore but for necessity, bid Physick Adieu.

Of Autumn.

☉ in ♎ ♏ ♐.

AUtumn or Harvest Quarter (commonly called the Fall of the Leaf, of some the latter Spring) doth begin when the Sun doth enter into the first degree of Libra, making again the day and the night of equal length. Which will be this year, the 13 of September, and doth continue whilest the Sun doth pass through Libra, Scorpio, and Sagittarius. This Quarter doth fitly resemble declining age, and Phlegmatick complexion.

A brief Chronological Description of many things worthy of memory that have hapned since the Creation unto this present year of our Lord 1658. with the year of the World in which they hapned in the first Column, faithfully collected from many good Authors.

There is lately Extant, An Excellent Medicinal Dispensatory, with a Physical Dictionary, containing the whole Body of Physick: composed by the learned *Renodæus*, chief Physitian to the Monarch of *France*, Englished by *R. Tomlinson* of *London* Apothecary, to be sold by *George Sawbridge*, at the Bible on *Ludgate*-hill.

Of the Eclipses this year 1658.

THere will be two Eclipses this year 1658. But neither of them visible in our Horizon, therefore I shall forbear to speak further thereof.

Excellent Notes of Husbandry and Gardening for each Moneth in the Year.

January Observations.

In this moneth, cut down timber (and it shall not cleave nor be eaten with worms) in the last quarter of the Moon set or sow Kernels and Bay-trees, Primet and Box, set Quicksets, Rose-trees, Peaches, Philbirds, and Plum-trees, if the frosts be not too hard, prune and lop them; before full Moon sow and set Beans and Pease, and dung Land: in the last quarter geld Cattel to rear, fallow Land for Wheat and Rye, trench Gardens with dung, and remove Bees: and for your own health keep your body warm, let good and wholsom Dyet be your Physician, moderate Exercise and Labor your Sauce to cause Appetite.

February Observations.

Sow all sorts of Pease, and other pulse, sow mustard-seed, cast up dikes, set and plant vines, hops, gooseberries, and any fruit that grows upon bushes, prune and trim all sorts of fruit-trees from moss, canker, and all superfluous branches, graft in the latter end of the Moneth, sow onions in cold stiff land, take heed of cold, forbear Phlegmatick meats.

March Observations.

In the new of the Moon (the wind any way but south or west) graft pears, wardens or apple-trees, make an end of sowing all manner of pulse, and begin to sow oats, barly, parsnips, onions, carrets, cucumbers, melons, and all kinde of pot-hearks, slip Jacobsoaks and sage; geld lambs, let blood according to strength and necessity, the sign and weather being also fit (but repair to the learned Physician) look what cannot be cured in the Spring by Physick, will hardly be cured all the year after.

April Observations,

Sow barly, hemp and flax, pole hops, set and sow all kinde of Garden herbs, open hives and let bees labor for their living, let Tanners now provide them with bark, and all good Huswives look to their Dairies, bleed and purge with advice, those that are troubled with aches or the gout, let them go to the Bath in this or the three following Months.

May Observations.

Sow barley on all light lands and bearing grounds, and likewise hemp and flax, and all manner of fine seeds and herbs, take Lambs from their dams, fire land for weeds and rye, leave lopping of trees, teach hops to climb, but cut off the superfluous branches, rise early, walk the fields, especially by running streams, sage and sweet butter is an excellent breakfast, sage and clarified whey, as also scurvy-grass ale, and wormwood beer are wholesome drink to be drunk fasting.

June Observations.

Shear sheep, bring home fewel, weed corn and gardens, set rosemary, coronations and gilly flowers, sow lettice and radish-seed three or four dales after the full, for then the moll not run to seed, make hay, carry sand, lime, marle and manure of what kinde soever, besitting your land, cut neither hedge nor tree, in this and the two next Moneths, because of great thirst, use thin and light diet, moderate exercise, and chaste thoughts.

July Observations.

Make your hay and house it while its fair weather, pull hemp that is ripe, gather garden-beans, & cut and season wood, and coal to store on your chambers, to destroy moths and flies, fence poles copples, use moderate diet, take heed of great thirst, for nothing bringeth the pestilence or pestilent diseases sooner then extream thirst, and ferbent heat and cold taken suddenly upon them, take no Physick, bleed not but upon all violent occasions.

August Observations.

Follow close your corn harvest, sow winter herbs in the new of the Moon, gather garden-seeds, mow barley and oats, harvest your Summer fruits, restrain from sleeping in the day time after meat, avoid fish and excess.

September Observations.

In the beginning of this Moneth and end of the former gather hops when they be brown, the weather being fair and no dew on the ground, kill bees, make perry, sow wheat and rye, remove and set all slips of flowers between the two Lady dales, put hogs to mast, remove trees every new Moon from September till February, especially in the new of the Moon, the weather fair and warm, wind south or west, use Physick moderately, forbear fruits too pleasant or rotten, shun riot and excess of diets.

October Observations.

Sow wheat and rye, the sooner the better, for fear of rain, set acorns and nuts, gather winter fruit, the weather dry, in the afternoon, and in the wain of the Moon, forbearers if you desire to have store of roses, do this once in two years, refuse not needful Physick at the hands of the learned, and use all moderate sports to refresh vital spirits.

November Observations.

Make malt, kill hogs, trench gardens with dung, set crab-tree-stocks, sow wheat & rye in exceeding hot lasting grounds, cut down timber for plows, carts, and other instruments for husbandry, use wholsom meat and drink, with good exercise to preserve health.

December Observations.

In this and the next moneth cut down timber, in the last quarter of the Moon, bare the roots of fruit trees, set beans and peas, cover all the best flowers and herbs from frosts and slooms with old rotten horseding, look well to your cattel, water them amidst your meadows, let horses blood, and drink good wine and strong drink, keep the body warm clad, thy house warm and dry, cast all care from you, and relieve those that are in want with thy charity: Thus I have ended these Observations which I have won for thy advantage, make good use of them, and give God the Glory. Vale.
